## NoMoCo Pillow Support System

### Comfort and Sensory Feedback with the

Working with clinical psychologist and research scientist MJ Meloy we bring you this unique head restraint kit for use in fMRI.

The NoMoCo Pillow Support System is an fMRI head restraint kit with a difference. The unique set of foam pads and accompanying head strap provide the **support**, **comfort** and **sensory feedback** necessary to maintain a subject's head in position for an extended period of time. The highest grade memory foam enables you to support the heads of subjects with all sorts of specific needs.

*“less motion in our imaging data... improvements in participant comfort...”*

We understand the frustration and cost of subject movement wasting scan data and are confident the solution can be found with a NoMoCo Pillow Support system.

## Based on a simple concept of human nature:

If someone is *comfortable* and receiving *sensory feedback*

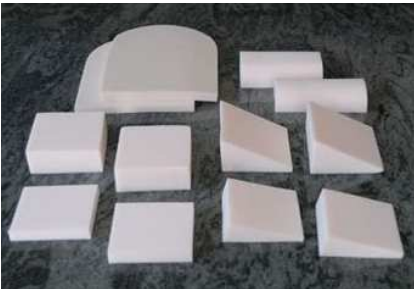

*“Comfort and motion are critical design concerns...”*

- Numbered pillows with easy to use instruction card.
- Soft flannel washable covers.

- Precision cut and hand made.
- Made from the highest grade memory foam.
- Technology based and experi-

*“...after trying other, less effective techniques, I happily settled on the NoMoCo Pillow System...”*

- Reduced patient discomfort.
- Reduction in movement especially in youth, older and sleep deprived subjects.
